

RFID PROGRAMMING

AND SECURITY

RADIO FREQUENCY IDENTIFICATION

What is RFID ?

- RFID works on Radio Frequency
- Consist of two main components
 - RFID Tag
 - RFID Reader

What is RFID ?

- RFID Reader continuously sends Radio Waves
- When the Tag is in the range it sends its feedback signals to the reader.

Types of RFID Frequencies

- Three Basic Types of RFID Frequencies
- Low Frequency (LF) 125 kHz or 134 kHz Range 8-10 cm
- High Frequency (HF) 13.56 MHz Range approx. 1 m
- Ultra High Frequency (UHF) 860-960 MHz Range 10 - 15 m

Applications of RFID

- Access Control
- Tracking
 - Library
 - Grocery Stores etc..
 - Animals
- Transportations
- Logistics
